

## Overall Reach & Coverage

- Total of **9,551 restaurants** analyzed.
- Presence in **15 countries** and **141 cities**, reflecting Zomato's wide global footprint.
- The strongest concentration of restaurants is in India.

## City-Wise Distribution

- **New Delhi** stands out significantly with **5,500+ restaurants**, showing it is a key market.
- **Gurgaon** and **Noida** are secondary hubs, each with around **1,100 restaurants**.
- Other cities like **Faridabad**, **Ghaziabad**, and **Ahmedabad** have notably fewer outlets.
- This suggests a high urban concentration, with rural or tier-2 city presence being relatively low.

## Cuisine Preferences

- **North Indian** is the most popular cuisine by count (**936 restaurants**), followed by:
- North Indian + Mughlai (**511 restaurants**)
- **Chinese** (**354 restaurants**)
- **Fast Food** (**354 restaurants**)
- **Cafe** (**299 restaurants**)
  
- Indicates strong customer demand for traditional and quick-service foods.

## Brand & Rating Performance

- Restaurants like **Barista**, **Baskin Robbins**, and **Domino's** have relatively **high average ratings**.
- High-rated chains indicate brand consistency and customer trust.
- Some restaurants have a **high count but lower average rating**, highlighting areas for quality improvement.

### Customer Services

- **Table Booking:**

Only **12%** of restaurants offer table booking.

Could be improved for customers seeking planned dining experiences.

- **Online Delivery:**

**74%** of restaurants support it, reflecting a strong digital delivery ecosystem.

Highlights shift toward **convenience-focused consumer behavior**.

- **User Engagement**
- **1,826 votes** and **28,000 total ratings** reflect active user participation and feedback.
- Can be leveraged for sentiment analysis, trend forecasting, and service improvements.

### Actionable Recommendations

- **Boost Presence** in underrepresented cities and regions to balance geographic spread.
- Promote **emerging or niche cuisines** to diversify the customer offering.
- Encourage restaurants to adopt **table booking systems**—especially in premium dining segments.
- Maintain and enhance **online delivery infrastructure**, as it aligns with customer behavior.
- Use **rating patterns** to identify top-performing chains and partner more closely with them.
- Improve quality and service consistency in restaurants with **low average ratings** but high footfall.
